1. The abstract of the disclosure is objected to because the abstract should describe the claimed subject matters as claimed in claim 123. Correction is required. See MPEP § 608.01(b).
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
3. The applicants should provide a copy of each of the references cited in pages 1-6, 13, 15, 18, 20, 24, 26, 27, 30, 32, 36, 38 and 40.
4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The resonant control system is inductively coupled to the first qubit in claim 123. The resonant control system comprises a Josephson junction and a bias current source that is connected in series with the Josephson junction in claim 126. The resonant control system is inductively coupled to a plurality of qubits in claim 136.
5. Claims 123-138 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: The major difference in the claims not found in the prior art of record is the resonant frequency corresponds to an energy difference between a first energy level and a second energy level of a first qubit, thereby entangling the quantum state of the first qubit with the quantum state of the resonant control system.

7. This application is in condition for allowance except for the formal matters in paragraphs 1 and 4 of the present Office Action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
